

## 3DS/DS Display Tower

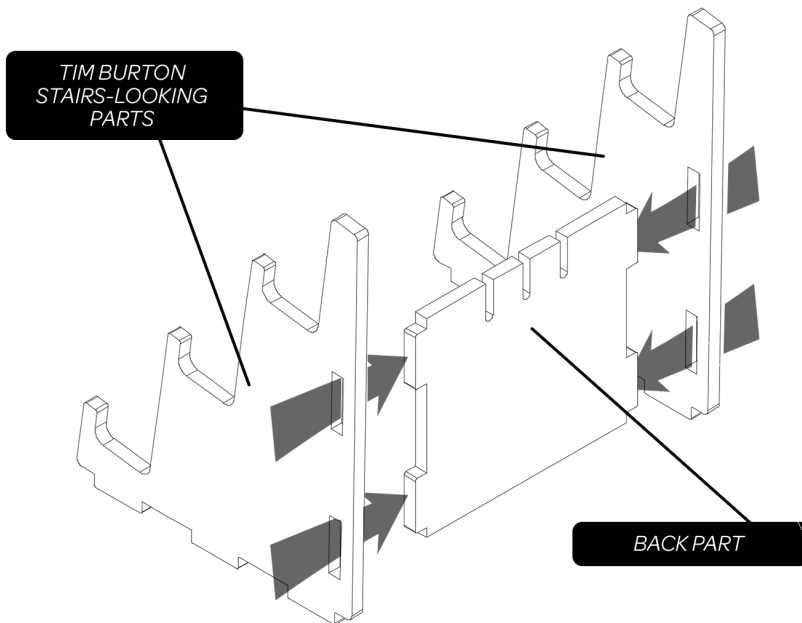

### STEP 1

Read the obnoxious warning on the back. Seriously. We want this purchase to improve your life, and if you don't read that warning, it could be significantly less good. So far, we've had zero destroyed DS/3DSs, but we want to keep it that way.

### STEP 2

You read that warning right? Cool. Might have mentioned something about it being important, so glad that's out of the way. ANYWAYS.

Your Display Tower comes with four parts. A base (the one with six holes), two side parts (the ones that look like stairs from a Tim Burton movie), and a back part (three lines in the middle). Look at the diagram below and do the same thing. It's important that these three parts are put together first before inserting into the base.

## WARNING WARNING WARNING

NEVER, EVER, EVER TRAVEL WITH YOUR 3DS/DSs ON THE DISPLAY TOWER. THE CHANCES THEY WILL FALL OFF ARE 94.5453%, THEN YOU WILL HATE US. WE USED A LOT OF BLACK INK UP HERE TO MAKE SURE YOU SEE THIS, SO PLEASE BE CAREFUL! PLACE THE TOWER WHERE YOU WANT IT, THEN PLACE DS/3DSs ON THE TOWER.

### STEP 3

Now that those three parts are together and your life is perfect, we just need to push all of those parts into that last part, the base. Be really gentle here.

Align the six holes on the base with the six anchor points on the bottom of the parts you just assembled. You might notice that it is easier to first insert the anchors that are closest to the front of the base, then rock the other anchors until they are seated well within the base.

Great work! Enjoy!

If the platform you purchased this from asks you to leave a rating – you don't have to, but it really helps to leave us a FIVE STAR review.

Of course, you might not want to do that. If you feel less than happy, tell us. We'll make it right. Message us on Facebook or Instagram: @gameshelf.games
