

3DS/DS Display Stand

ASSEMBLY INSTRUCTIONS

Assembling your new 3DS/DS Stand is very easy, but you have to be careful!

On an even, flat surface, place the base down flat – then carefully insert each leg straight down into the base into the two holes on either side. Do not bend or wiggle the legs into the slots. You could chip or crack them. They are carefully inspected and tested before shipment to ensure they insert into the base without too much resistance.

Pretty simple, right?

NEVER MOVE OR TRAVEL WITH THE SHELF IF THERE IS A CONSOLE ON IT. This is a display shelf. Your console will easily fall off of it if not in a stationary position.
