

Game & Watch Shelf mini

MOUNTING INSTRUCTIONS

Game & Watch Shelf helps clear up space, and prevent children or pets from accidentally causing damage to your precious video game accessories. Use these additional precautions to increase the life of your investment.

Clean wall with rubbing alcohol. Do not use household cleaners.

With Command Strips pressed onto the Game & Watch Shelf, remove protective paper from the strips that stick to the wall. Firmly press the Game & Watch Shelf to the wall for 30 seconds.

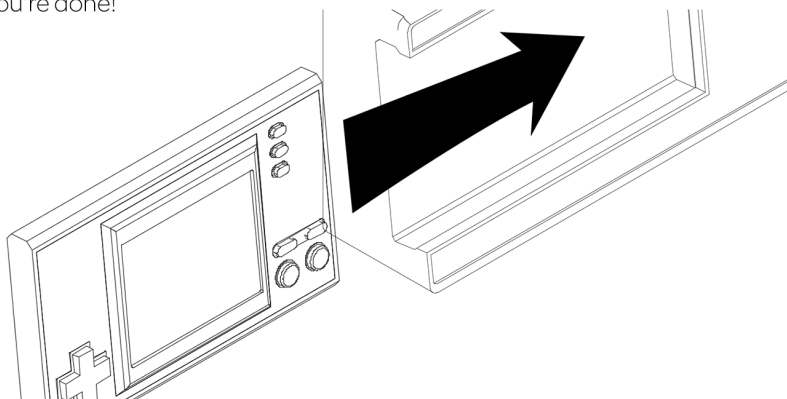

Pull the Game & Watch Shelf away from the wall, decoupling from the Command Strips. Place your Game & Watch Shelf some place safe for now.

With the Game & Watch Shelf out of the way, apply more pressure to the Command Strips that are mounted on the wall, ensuring they are adhering to the wall well.

Wait one hour, then align your Game & Watch Shelf to the Command Strips on the wall and press firmly until you hear a bunch of velcro-y sounds (this is the science term for this phenomenon).

With your USB cable attached and your Game & Watch Shelf mounted to your wall, you can now slide your Game & Watch into the shelf.

You're done!
